Universal AC travel adapter AK-AD-61

Irreplaceable in every journey

The small size **Akyga® AK-AD-61 travel adapter** is ideal for trips abroad. With three interchangeable adapters, you no longer have to worry about whether your charger will fit into socket.

Wide compatibility

English plug

American plug

Australian plug

European plug

The adapter is characterised by its extraordinary versatility. It enables conversion of the most popular types of electrical sockets, i.e. English (type G), American (type B), Australian (type I), or European (type C, E and F) to sockets type: A, B, C, D, E, F, G, H, I, J, K, L, M, N.

Common sockets for different standards

Specially designed holes allow you to connect different types of plugs, both rectangular and round with different pin diameter. This ensures comprehensive compatibility with many standards and thus reduces the size of the adapter.

Universal parameters

The product enables effective power supply and charging of devices with voltage in the range **110 - 250 V**. This ensures compliance with the mains voltage in every country in the world.

European plug

The EU plug connector is compatible with C, E and F sockets in Europe, Russia and Greenland. It allows you to connect devices in standards: A, B, D, M, N, H, I, J, K and L.

English plug

The UK end has a type G plug, which is mainly used in the UK, Ireland, China, Malta and Cyprus. It allows to power equipment from countries using standards: A, B, C, D, E, F, H, I, J, K, L, M and N.

Australian-American plug

The AU/US multi-plug has two sliding pins for compatibility with B and I standards. These standards are used, among others, in Australia, the USA and Japan. On the other side of the plug there are sockets type: C, D, E, F, G, J, K and M.
