Opis produktu

Power Supply AK-ND-81 5 - 20V / 3 - 3.25A 65W USB-C Power Delivery 3.0 GaN

The Akyga® AK-ND-81 USB-C power adapter is a compact device designed for fast charging of electronics. It is equipped with a **USB-C cable**, currently the most popular charging standard for mobile devices in Europe. In addition, thanks to the support of PD 3.0 (Power Delivery 3.0) technology, the power supply automatically adapts the power parameters to the currently connected device. As a result, it can deliver a voltage **from 5 to 20 V** and a current from **2.25 to 3 A**, ensuring fast and safe battery charging.

The AK-ND-81 **USB Type C power supply** with a power output of **65 W** has a versatile application. It is ideal as a **power supply for laptops** as well as a **mains charger for phones**. It easily meets the power needs of the new generation of notebooks with a USB-C port - from MacBooks and Chromebooks to Lenovo, DELL, as well as Samsung ultrabooks. In addition, it is also ideal for charging mobile devices such as iPads, iPhones, as well as Android smartphones and tablets using USB-C, providing them with fast and efficient charging.

A key aspect of the AK-ND-81 USB-C power adapter is the use of innovative **GaN** (gallium nitride) **technology**. It uses much smaller electronic components than in traditional designs. This makes the power supply stand out with a particularly slim design and is smaller than most products of its kind, emphasising its modernity and practicality.
