Opis produktu

RGB Lighting Gaming Chair Irida RGBCH03

Meet the RGB Lighting Gaming Chair Irida RGBCH03 – why settle for a chair when you can have a light show too? Starting with the obvious: RGB lighting with remote control. Customizable lights that dance, pulse, or stay solid in your choice of color, all controlled with a remote. Perfect for streamers or anyone who believes that gaming and ambiance go hand-in-hand. Now, comfort takes center stage. The original cold-molded foam ensures snugness and holds its shape through thick and thin. Long hours? Marathon gaming sessions? This foam is built to keep you comfy, game after game, hour after hour. Wrapped in PU eco leather, the chair provides comfort, durability and stylish look; you won't peel away from it after a heated match. It's durable, easy to clean, and crafted to outlast anything. The durable metal frame supports up to 150 kg (337 lb), so you're supported both when you're leaning forward and reclining. Speaking of which, the adjustable backrest goes from a 90° all the way to a 180° – perfect for both "serious" and "napping" modes. The butterfly mechanism gives you extra flexibility to tilt, rock, and lock into the perfect position. The 5-star nylon base is fitted with quiet 50 mm casters, letting you glide across space silently and ready for action. The Class-4 gas lift adds an extra bounce, letting you adjust your chair to the ideal height effortlessly. Perfectly positioned, the headrest and lumbar pillows support your neck and lower back to keep gaming ache-free. They're adjustable and removable, too.

RGB Lighting & Remote Control

This is where the magic happens. Experiment with the colors and effects with the remote control to set the vibe for your gaming sessions. A chill blue for focus or a blazing red for intense matches – it's your call; this chair delivers a whole light show.

Durable Metal Frame

The durable metal frame provides unmatched support and long-lasting durability. Built to endure everything from casual use to the heat of the action, this frame is solid, unyielding, and ready for anything.

Ergonomic Design

One more game doesn't have to compromise your comfort. Carefully engineered to support natural body alignment, this chair keeps your posture in check so you can play longer without the post-session backache.

Comfortable Seat

The comfortable seat of this chair is crafted from original cold-molded foam. You get consistent support that holds its shape and props you up even after hours of sitting. Take our word for it: your seat will stay as inviting as the first time you sat down.

Powerful Class-4 Gas-Lift

When it comes to adjusting your chair, there's little space for compromise. The Class-4 gas-lift provides reliable height adjustments with a smooth glide. It can handle up to 150 kg (337 lb) with ease. No sudden drops – just steady, responsive movement.

High-Quality PU Eco Leather

The high-quality PU eco leather is soft to the touch but tough enough to withstand the occasional spill or marathon gaming sessions. Easy to clean and built to handle daily use, it's a fabric that combines style, comfort, and practicality.

Adjustable Backrest

Tilt it from a perfectly upright 90° to a fully reclined 180° to suit your needs. Going from "I'm in it to win it" to "nap time" needs just one simple adjustment.

Lumbar Support

The lumbar support provided by a dedicated pillow will keep your lower back aligned and pain-free. It's also adjustable and removable: you can find the perfect fit or take it off when you don't need the extra boost.

Headrest Pillow

The headrest pillow is there to support your neck, reduce tension, and let you lean back comfortably while plotting your next move. It's like the cherry on top – small but essential for the ultimate cozy experience.

5-Star Nylon Base

Stability is non-negotiable, and this chair's 5-star nylon base delivers it. Your chair won't wobble no matter how intense the game gets. Paired with quiet casters, you'll glide across the room smoothly and silently, like the stealthiest of ninjas.
