Opis produktu

Wireless mouse OnClick 20

The OnClick 20 is designed to make everyday work and browsing simpler, quieter, and more comfortable. Every time you're at home, in a shared workspace, or on the go, its silent-click buttons let you stay focused without the distracting noise of traditional mice. Left and right switches are rated for over 3 million clicks, giving you lasting performance that stays under the radar.

But there's more to this mouse than just silence. The OnClick 20 offers serious precision, with adjustable DPI up to 1600, a 250Hz polling rate for fast responsiveness, and 8G acceleration for smooth, controlled movement. If you need to edit documents, navigate spreadsheets, or just get through a long day of tabs and tasks, it tracks reliably and effortlessly.

The ergonomic shape is built for comfort during long hours, while six intuitive buttons, including a silent switch, give you quick access to essential functions without added bulk. Its 2.4GHz wireless connection keeps things stable, even from up to 10 meters away. Just pop in two AAA batteries and you're set.

The OnClick 20 blends practicality and thoughtful design in one lightweight device. It's the kind of mouse you can forget you're using until you notice how much better everything feels.

Wireless Freedom, No Fuss

The OnClick 20 connects via a stable 2.4GHz wireless signal, giving you the freedom to move without dragging a cable behind. With an operating range of up to 10 meters, you can work from the sofa, desk, or even across the room without delay or dropouts. Just plug in the receiver and you're ready, no setup needed.

Comfort That Lasts

Shaped to fit the natural curve of your hand, the OnClick 20 is built for all-day use without strain. Its ergonomic design supports a relaxed grip, helping you stay comfortable when you're working, browsing, or gaming. Lightweight and well-balanced, it's a mouse that feels right from the first click.

Quiet by Design

No more sharp clicks breaking your focus: the OnClick 20 features silent switches on the left and right buttons for a smoother, quieter experience. Ideal for shared spaces, late-night work, or simply reducing noise, it keeps things discreet without sacrificing responsiveness. With over 3 million silent clicks guaranteed, it's built to be heard less and last longer.

More Control at Your Fingertips

With six responsive buttons, the OnClick 20 gives you quick access to everything you need — whether it's navigating pages, switching tabs, or performing custom shortcuts. The layout is intuitive and easy to adapt to, helping you work faster without changing how you move.

Precision That Adapts to You

Switch between 1000, 1200, and 1600 DPI settings to match the task at hand, like fine control for editing or quick movement

for browsing. The OnClick 20 lets you adjust sensitivity on the fly, giving you smooth, responsive tracking that feels just right.
