Kod EAN	5291485019730

Opis produktu

Powerbank OnPower 150

The OnPower 150 is the definition of portable energy, a solution created for those who depend on both power and adaptability to complete their tasks. With a high-capacity 15,000mAh Li-Polymer battery and advanced smart IC chipset, it delivers fast and steady charging to laptops, phones, and tablets, and it can do so several times without interruption.

Dual 100W Type C Power Delivery ports enable the powerbank to charge two laptops or high-drain devices at the same time. This is the right option if you're looking to stay productive anywhere work takes you. Integrated Qi2 magnetic wireless charging is convenient for mobile users, while legacy USB-A and multi-voltage support works perfectly for headphones, cameras, and other everyday electronics.

OnPower 150 adapts to each device's needs with smart power distribution, delivering efficient charging and protecting against overheating and overloads. Its dark grey shell conceals flexible safety features, which makes this device equally suitable in a bag, on a desk, or in a conference room. For users who require reliability when it comes to charging, OnPower 150 exceeds expectations of what a powerbank can do.

Powerful 15,000mAh capacity

This powerbank has ample energy to fully recharge laptops, tablets, and phones more than one time. It's the go-to solution for demanding workdays or long-distance travel.

Ultra-Fast Laptop Charging

Each of the two USB(C) ports offers up to 100W of Power Delivery, which enables quick and sustained charging for power-hungry devices like MacBooks, ultrabooks, or tablets.

Charge two laptops at once

Dual Type C outputs make it possible to recharge two laptops at the same time without sacrificing charging speed. Stay charged and make sure your productivity doesn't stop.

Qi2 magnetic wireless charging

This powerbank delivers next-generation Qi2 wireless charging for secure alignment with compatible devices, no cables required.

Universal compatibility — USB-A + USB-C outputs

USB-A and USB(C) outputs will help charge any mobile device, tablet, or accessory no matter the brand or model.

Smart IC chipset

An advanced Smart IC system allocates power to maximize charging efficiency and protect your connected devices from overload or overheating.

Future-ready performance — supports multiple fast-charging standards, including PD and QC.

The powerbank supports current and emerging fast-charging standards, including PD and QC, so it works seamlessly with the latest electronics.

Elegant dark grey finish

Designed with a premium dark grey finish, this powerbank looks sleek and feels convenient for everyday use.

True versatility

The powerbank combines high-wattage wired and magnetic wireless charging options, which makes it efficient in any charging scenario.

Reliable daily backup

Designed for professionals, travelers, and busy users, OnPower 150 is the go-to power solution to make sure every essential device is ready at all times.
