Opis produktu

Magnetic Phone Holder OnGrip 10

Meet the OnGrip 10, our magnetic phone holder that combines heavy-duty engineering and everyday convenience. Designed for users who value both stability and style, it will keep your smartphone exactly where you want it without slipping, shaking, or distractions.

The solid aluminum body feels as sturdy as it looks, built from thick-duty material to handle years of use without loosening or wearing down. Inside, 17 premium N52 neodymium magnets create a powerful hold that keeps your phone locked in place.

Its dual-axis foldable design and 360° rotation mean you can position your phone at the perfect angle for navigation, calls, or music as you drive without blocking your view of the road. And thanks to the industrial-strength damping mechanism, the OnGrip 10 maintains smooth, precise movement after 2,500+ rotation cycles with no sign of wear.

Each holder comes with two magnetic rings for universal compatibility, ensuring it works flawlessly with both iPhones and other smartphones. We've also included an extra 3M adhesive sticker in the box, so you can easily reinstall or move your holder whenever needed.

The strong adhesive mount lets you install it on almost any surface from your car's dashboard to your office desk or even a bedside table. Once it's there, it's not going anywhere. The OnGrip 10 is a rock-solid companion not just for the road, but for every place you need a reliable phone holder.

Unshakable Magnetic Grip

Powered by 17 N52 neodymium magnets, the OnGrip 10 delivers exceptional suction strength that keeps your phone stable even on bumpy roads and sharp turns.

Full 360° Viewing Freedom

The rotating joint lets you position your phone at the perfect angle for navigation, calls, or media and keep it in clear view without blocking your line of sight.

PopSocket-Friendly Design

The hollow-center structure ensures full compatibility with PopSockets and other phone grips, so you don't have to remove your favorite accessories to mount your phone.

Engineered for Longevity

Built from Solid Metal

Crafted from heavy-duty aluminum, the holder's body is resistant to bending, breaking, or loosening, ensuring long-lasting durability.

Universal Magnetic Rings Included

Two high-quality magnetic rings come in the box for use with any smartphone, ensuring a perfect fit whether you have an iPhone or another brand.

Mount Anywhere You Need

The strong adhesive base sticks securely not only in your car but also on desks, workstations, or other flat surfaces, giving you flexibility beyond driving. Plus, an extra 3M adhesive sticker is included, so you can reinstall or change the mounting spot whenever you like.
