Opis produktu

Phone Holder OnGrip 11

Meet the OnGrip 11, our universal phone holder designed for people who need reliability, stability, and flexibility on the move. Clip it onto a desk, a nightstand, a shelf, or even use it in the car: this holder adapts to your lifestyle and keeps your phone exactly where you want it.

Engineered with a powerful clip mount that opens up to 3cm, the OnGrip 11 attaches securely to a wide variety of surfaces. Unlike standard holders that slip or wobble, its all-metal precision hinge and no-loosening pivot design ensure long-lasting stability even after years of use or exposure to heat.

The premium magnetic system features 17 N52 neodymium magnets that deliver superior holding power (10N-12N compared to competitors). Your phone will stay perfectly steady as you're typing, scrolling, or charging. And with MagSafe compatibility**, iPhone users can snap their device directly onto the holder, while Android users can rely on the two included magnetic rings for the same strong grip.

Designed with convenience in mind, the hollow-center mount supports PopSockets and ring holders without needing removal. Keep your favorite grip accessory and still enjoy seamless magnetic docking. The OnGrip 11 is a universal solution that's perfect as a workstation stand, a travel charging dock, or a compact mount. Strong, adaptable, and built to last, it's a reliable companion for your everyday life.

Premium Magnetic Performance

Equipped with 17 N52 neodymium magnets, the OnGrip 11 delivers exceptional magnetic force. Your phone stays firmly in place with a holding power of 10N-12N, outperforming most competitors and maintaining rock-solid stability in any situation.

Strong & Versatile Clip Mount

The adjustable clip opens up to 3cm, allowing you to secure the holder to desks, shelves, nightstands, or car interiors. Built to withstand daily use, the mount grips tightly without slipping.

Hollow-Center Design

Enjoy seamless compatibility with PopSockets and ring holders thanks to the hollow-center design. There's no need to remove your favorite grip accessory as the holder accommodates it effortlessly, so you can dock your phone in seconds.

Two Magnetic Rings Included

Not using an iPhone? No problem. The OnGrip 11 comes with two magnetic rings that attach to any smartphone, giving Android devices the same premium holding strength as MagSafe-enabled phones.

MagSafe Compatible*

Designed for iPhone users, the OnGrip 11 supports MagSafe* technology, letting you attach your device instantly with a secure, effortless connection. *MagSafe is a trademark of Apple Inc., registered in the U.S. and other countries. This product is not affiliated with or endorsed by Apple Inc.
