Czas wysyłki	48 godzin
Numer katalogowy	BK-003136
Kod producenta	LRG-CHA41-BL
Kod EAN	5291485020323

Opis produktu

LORGAR CHA41

Blue gaming chair, designed for comfort during long sessions in front of the computer. Ergonomic design and solid workmanship provide good support for the body, perfect for both gaming and everyday work.

COLD-MOULDED MEMORY FOAM

Most gaming chairs in this segment use standard cut foam that compresses within months. LORGAR CHA41 uses cold-moulded memory foam - a denser material produced under pressure at lower temperatures. It conforms to the body under load and recovers its shape when unloaded. Seat comfort stays consistent through extended sessions because the foam distributes weight across a wider contact area instead of creating pressure points.

FULL METAL FRAME AND BASE

LORGAR CHA41 has an internal frame that is metal throughout, from the backrest skeleton to the seat plate. The 70 cm five-star base is also metal, wider than the 65 cm standard common in this price range. A wider base lowers the tipping threshold and keeps the chair planted during movement. Combined with the Class 4 gas lift, the structure supports a maximum load of 150 kg (331 lb). The chair accommodates users between 150 cm and 190 cm tall.

3D ADJUSTABLE ARMRESTS

The armrests adjust in three directions: up/down, forward/backward, and side-to-side pivot. This allows positioning the arm pads to match different desk heights and shoulder widths. Proper armrest alignment reduces shoulder strain during long sessions, especially when desk height and chair height create an awkward gap.

MAGNETIC HEADREST PILLOW

The headrest pillow attaches to the backrest with embedded magnets instead of the elastic straps used on most gaming chairs. Straps stretch over time and shift during use. Magnets hold position reliably and let users snap the pillow on or off in seconds. The pillow can sit at different heights on the backrest, depending on the user's neck position.

ANTI-STAIN DURABLE FABRIC

LORGAR CHA41 uses polyester fabric rather than PU leather. Fabric breathes better during warm conditions and avoids the peeling that PU leather sometimes develops after a few years of regular use. The anti-stain treatment adds a spill-resistance layer that gives users a short, but useful time window to wipe liquids before they soak in. Fabric surfaces also require less

maintenance than leather alternatives.

95-155° ADJUSTABLE BACKREST

The backrest locks at any angle between 95° (slightly upright) and 155° (near-flat recline). At 95°, the posture stays active for competitive gaming. Tilted further back, the chair works for watching content or resting between sessions. A locking mechanism holds the angle securely at each position without gradual drift.

QUIET 60 MM PU CASTERS

The 60 mm polyurethane casters are larger than the 50 mm standard on many chairs in the comparable price range. Larger wheels roll more smoothly over carpet-to-hard-floor transitions and small obstacles like cable covers. The polyurethane material dampens rolling noise and avoids scratching hardwood or laminate flooring.

Availability

The LORGAR CHA41 ships in four colorways: black/white, black/purple, grey/purple, and blue/white to fit into different interiors. Package includes the chair components, headrest pillow, lumbar pillow, and assembly hardware.

LORGAR IS ALL ABOUT LEVELING UP YOUR GAMING

Specyfikacja produktu

- **Typ:** fotel gamingowy
- **Kolor:** Niebieski/Biały
- **Maksymalne obciążenie:** 150 kg
- **Regulacja oparcia:** 95°–155°
- **Podłokietniki:** Regulowany 3D
- **Regulacja wysokości:** Podnośnik gazowy klasy 4
- **Kod producenta:** LRG-CHA41-BL
- **EAN:** 5291485020323
