Opis produktu

LORGAR VOICER SMP40 GAMING MICROPHONE

This black gaming microphone features striking RGB backlighting and a sturdy metal stand. Its well-thought-out design ensures stability and clear sound, making it ideal for both streaming and everyday recording.

SELF-POWERED REMOTE WITH PIEZO TECHNOLOGY

LORGAR™ Streaming Microphone Pro SMP40 introduces an industry-first innovation: a completely self-powered remote mute button that operates without batteries or charging. Using piezo-electric technology, it generates its own power during the press of a button, enough to transmit a wireless signal up to 5 meters to instantly toggle the microphone on or off. This breakthrough means the remote control will never run out of power - making it truly eternal.

CARDIOID POLAR PATTERN

Picks up sound from the front and eliminates noise from the sides. Engineered for high-quality voice recordings. The extended frequency response of 73Hz to 19.2kHz ensures every nuance of the voice is captured with crystal clarity. Recommended for streaming, gaming communication, and podcast recording.

IMMERSIVE RGB LIGHTING

Extensive RGB lighting creates a striking visual presence, fully customizable through LORGAR PLATFORM. Synchronize effects with other LORGAR™ devices for a cohesive gaming setup. In addition, it is possible to switch among 8 colors, 3 patterns, or turn RGB off using the touch hardware button on top of the device.

A WIDE RANGE OF APPLICATIONS

Suitable for all microphone use cases. Gaming communication, streaming, podcast recording, work meetings. Supports Discord, OBS, FL Studio, Skype, Zoom, and other programs. Compatible with Windows, macOS, Android, and PlayStation.

ULTIMATE EASE OF USE

Plug and play - no additional software required. Simply connects to a computer with a USB cable. No complicated settings or professional skills required. The sound is adjusted on the go through the built-in gain knob.

LORGAR PLATFORM INTEGRATION

Customize RGB lighting patterns, monitor performance statistics, and create unified lighting themes across all LORGAR™

devices using Windows-based LORGAR PLATFORM software.

LORGAR IS ALL ABOUT LEVELING UP YOUR GAMING
