Opis produktu

Magnetic Phone Holder OnGrip 12

Take hands-free driving to the next level with the OnGrip 12, a premium magnetic phone holder combining strength, adaptability, and style. Featuring 17 high-grade N52 neodymium magnets, it delivers rock-solid suction to keep your phone firmly in place even during sudden stops or on uneven roads. MagSafe compatibility ensures seamless use with iPhones, and two included magnetic rings make it perfect for any other smartphone brand.

The set includes not just one, but two different holders — a flexible arm mount and a vent hook mount. This gives you the freedom to choose the setup that works best for your car and your needs.

The flexible, shockproof arm is crafted from durable TPU and aluminum, with a reinforced base that attaches firmly to both windshields and dashboards. It allows smooth, precise positioning without wobble, while the dual 360° rotation system gives you full control over both height and horizontal angles. Need to keep your PopSocket or ring holder? The smart hollow-center design ensures compatibility for grips up to 41mm in diameter.

Built for the long haul, the industrial-strength damping rotation mechanism has been tested for 2,000 cycles, ensuring years of flawless performance. The second option, a secure metal vent hook, offers a space-saving solution that preserves your dashboard and works with both horizontal and vertical vents.

Two Mounts in One Box

With OnGrip 12, you don't have to choose. The package includes both a flexible arm mount and a vent hook mount, providing two reliable ways to secure your phone. Switch between them depending on your needs: one works perfectly on the dashboard or windshield, and the other saves space by attaching neatly to your air vent.

Unshakable Magnetic Grip

Powered by 17 premium N52 neodymium magnets, the OnGrip 12 delivers exceptional magnetic suction to hold your phone firmly in place even over bumps, sharp turns, or sudden stops.

Dual 360° Rotation Freedom

Adjust your phone to the perfect viewing angle with two independent 360° rotation joints. Effortlessly tilt, swivel, or reposition for both height and horizontal alignment.

PopSocket & Ring Holder Friendly

The hollow-center design ensures your PopSocket or ring holder (≤ 41 mm in diameter) won't get in the way, letting you mount your phone without removing your favorite grip accessory.

Shockproof Flex Arm

Crafted from durable TPU and aluminum, the flexible arm offers smooth adjustment without wobbling. Its reinforced base sticks firmly to both glass and dashboard surfaces, so your setup stays stable anywhere you mount it.

Vent Hook Mount for Everyday Use

The second option is a compact metal vent hook, perfect for saving space and maintaining airflow. Designed to fit both horizontal and vertical vents, it stays unshakeable during long drives.

MagSafe Compatibility

Perfectly works with MagSafe-enabled iPhones for quick magnetic attachment. For non-MagSafe phones, two included magnetic rings ensure equally strong performance. MagSafe is a trademark of Apple Inc., registered in the U.S. and other countries. This product is not affiliated with or endorsed by Apple Inc.
